MEMORANDUM FOR GENERAL OSMUN:

On your visit to the Military Branch, 6 Sept., you discussed the question of an additional teletype circuit to an installation at MITC.

The attached analysis indicates a very small volume of traffic on the present circuit.

Removal of this apparatus from the Message Center would violate the principle of message center control of traffic. Direct and expensive "chatter" between stations.

/s/ C.A. Drake

C.A. DRAKE
Lt. Col., G.S.C.

Col. McCremon!
Before any changes is
made in the teletype circuits or
location of machines, let me know
the essentials of the situation and
reasons.
